EDUCATION

Shivajirao Kadam Institute of Technology

B.Tech in Computer Science

Inodre,(MP)

May 2025

Saraswati Vidhya Mandir

Higher Secondary (12th)

Pithampur,(MP)

March 2020

Training

Naresh IT – Java Full Stack Development Training

August 2025 – Present

- Gained hands-on experience in Core Java, JDBC, Servlets, JSP, Spring, and Hibernate for backend development.
- Learned front-end technologies including HTML, CSS, JavaScript, and React to build responsive user interfaces.
- Worked on real-time projects integrating both frontend and backend to develop complete full-stack web applications.

INTERNSHIP EXPERIENCE

May 2023 - Nov 2023

Amstech Incorporation Pvt. Ltd.

Indore,(MP)

- Communicate with managers to set up campus computers used on campus
- Assess and troubleshoot computer problems brought by students, faculty and staff
- Maintain upkeep of computers, classroom equipment, and 200 printers across campus

PROJECTS

ISRO Website Clone — HTML,CSS (Hackathon project, Naresh IT) |

- * Replicated the ISRO website layout and content (Home, Universe, About, Contact, mission/launch sections) using semantic HTML and CSS; implemented image galleries and structured mission cards to mirror real launch data.
- * Hosted the live project on GitHub Pages (<https://code-with-sagarr.github.io/ISRO-CLONE/>) to demonstrate a production-like static site and presented the project during the Naresh IT hackathon.

Personal Portfolio Website — HTML, CSS , Animation (In Progress) |

- * Designing a responsive and visually appealing personal portfolio to showcase projects and skills, using advanced CSS animations and transitions for smooth UI effects.
- * Hosted the live version on GitHub Pages (<https://code-with-sagarr.github.io/Portfolio-with-animation/>) with ongoing updates to improve layout, interactivity, and mobile responsiveness.

QuickIt / Blinkit Clone — HTML, CSS Responsive Layout |

- * Developed a grocery e-commerce style frontend interface mimicking Blinkit, including features like product listings, “Add to Cart” buttons, category navigation, and estimated delivery times.
- * Hosted on GitHub Pages (<https://code-with-sagarr.github.io/quickit/>), with emphasis on visual appeal, responsive design, and user experience across devices
